

CLAIM AMENDMENTS:

Please replace the pending list of claims with the following claim listing:

1-15. (Cancelled)

16. (New) A lighting unit comprising:

a number of individually moveable lamps;

motor means for adjusting the position of said lamps;

controlling means for transmitting drive signals to said motor means in dependence

upon received control signals;

a number of detectors for receiving remote signals;

wherein said detectors respond to two distinct kinds of signals, a first kind of signal being a beam of modulated light which when substantially aimed at one of said lamp activates said lamp, and a second kind of signal for triggering the positioning of said lamps without necessarily having to aim at said lamp.

17. (New) A lighting unit according to Claim 16, wherein a particular second kind of signal triggers the collective positioning of a group of lamps to at least one pre-determined positions.

18. (New) A lighting unit according to Claim 16, wherein means operatively connected to the lighting unit store a set of data defining a movement sequence and a timer triggers positioning at predefined periods, whereby at least one lighting unit is commanded to move through a sequence of movements.

19. (New) A lighting unit according to Claim 16, further comprising means for changing the color of the light radiated by the lighting units.
